Riyadh, KSA • +966 535-619232 • shafique.imran@gmail.com

SOLUTION ARCHITECT | FULL STACK DEVELOPER | WEB METHODS INTEGRATION DEVELOPER

Comprehensive experience in delivering highly complex and large-scale technology projects.

Result-driven solution architect and Microsoft certified developer with extensive experience in spearheading the management, design, development, implementation and testing of IT solutions. Adept at working with management to prioritize activities and achieve defined project objective; able to effectively translate business requirements into technical solutions. Consistently recognized for improving organizational efficiency with comprehensive expertise in strategies, requirements elicitation and business process enhancement.

AREAS OF EXPERTISE

- Agile Software Development • Database Development • Hands-on experience with SOAP, REST APIs • Enterprise Integration • DevOps • Web Application Development
- Team Leadership • Process Automation • Low Code Development

TECHNICAL SKILLS

DATABASE:	Oracle, SQL Server 2008/2012, MySQL, PostgreSQL
API GATEWAY:	Proficient in-Service development using SAG designer and integration server.
TECHNOLOGY STACK:	.Net/.NetCore, ASP.Net Web Forms, MVC, Java Script, jQuery, Angular, ADO.NET, SQL/PLSQL, Entity Framework, WCF, C#, VB.Net, Python, AJAX, Windows Application development
SOFTWARE / TOOLS:	Visual Studio, Crystal Report, SSRS, Oracle BI Publisher, IIS, Git, Visio and Azure DevOps
CLOUD:	Microsoft Azure
BPM:	Appian

PROFESSIONAL EXPERIENCE

BAYAN CREDIT BUREAU, Riyadh - KSA

Jan 2018 – Present

SR. APPLICATION DEVELOPER

As a senior technologist, I collaborate closely with product owners and system analysts to comprehend client requirements and refine solutions accordingly. I provide technical guidance to the development team throughout the project life cycle, troubleshooting and resolving any technical issues that arise during the project and in production. I conduct code reviews to ensure high quality project deliverables. Additionally, my expertise extends to database design, performance tuning, query optimization, and most importantly application development across diverse technology stacks.

Key Accomplishments

- Successfully convert Bayan core middleware service and API products to web Method services.
- Engineered continuous integration & deployment (CI/CD) of all running projects using Azure DevOps Server.
- Implemented major enterprise integration with major public and private organizations and systems.
- Contributed to all technical aspect to implement best API security best practice that includes Basic Authentication, web token and certificate-based communication.
- Headed and timely closed out-sourced software development projects.
- Developing integration solutions with Web Methods API Gateway, API Development, API proxy creation, Routing Policies, Adapter service and deployment with WM Deployer component.
- Accomplished the development and delivery of an administrative tool integrated with active directory, used by business unit managers to maintain roles, security group, workflow, and other related administrative features.
- Developed a portal on Appian Version 19.3 and worked extensively on SAIL forms, expression rules, query entity rules and constants, deployed new application features from test to production environment.

AL-SORAYAI INDUSTRIAL AND TRADING GROUP, Jeddah - KSA

Sept 2010 – Dec 2017

SR. SOFTWARE ENGINEER

Played a key role as a senior resource directed large scale in house developed manufacturing resource planner which handled the manufacturing processes of group diversified textile products. Technologies used in this position include C#, ASP.Net web forms, Oracle 11g, Entity Framework6, LINQ, AJAX and web services to manage data among desperate system.

Key Accomplishments:

- ❑ Delivered a mission critical MRP solution under limited resource and time.
- ❑ Handled the project integration services with third party software and hardware which includes BARCO, Weave Link, Fingerprint devices and Oracle EBS.
- ❑ Developed B2B payment solution integrated with Oracle financials to post payment (payroll, supplier and Govt. payments) directly to banks (NCB and ANB) servers.
- ❑ Developed an inventory management solution on .Net compact framework for hand-held scanner devices system directly integrated with Oracle Supply Chain module through web service.
- ❑ Developed and employed both manual and automated testing approaches and coordinated with the test team to establish proactive ongoing operating mechanisms.

ICILTEK, Karachi, Pakistan

Jul 2008 – Aug 2010

SENIOR SOFTWARE ENGINEER / .NET TEAM LEAD

Functioned as a senior software engineer and lead a team of developers in developing high-quality software's within agreed project deadlines.

Key Accomplishments:

- ❑ Instrumentally lead the team in development and implementation of different solutions like point of sales, human resource suit, assets management, task and project management solution and complete ERP solution for SME business. Designed and implemented information technology strategies by managing staff, researching, and implementing technological strategic solutions.
- ❑ Assist business units in identifying feasible solutions to operational issues and provide technical consultancy during the preparation of system requirements and the translation of those requirements into product specifications.
- ❑ Prepared required documentation for the selected releases and ensured quality and timely deliverable. Performed integration of bio-metric devices with Attendance System so that system able to synchronize data directly from machine; code reviews and ensures the accomplishment of unit testing by the developers and removal of bugs reported.

INITIAL CAREER GLIMPSE

- ❑ March 2006- May 2008 with International Credit Information Limited Karachi, Pakistan as Software Engineer.
- ❑ April 2004 - Jan 2006 with Xibercom Private Limited – Karachi, Pakistan as Software Developer
